About ELEPAP...

ELEPAP-Rehabilitation for The Disabled, a rehabilitation centre with six branches throughout Greece and more than 80 years of history, supports the development of children with physical disabilities and developmental difficulties and at the same time provides support to their families.

ELEPAP offers a series of integrated intervention programs for infants, pre-school and school- age children. Furthermore, ELEPAP cooperates with the Public Special Schools operating in its facilities.

The interdisciplinary team of ELEPAP applies a holistic approach to all evolutionary domains (psychomotor development, functionality, self-care, speech and communication, education, socialization) and treats development as a multidimensional and dynamic process. A crucial factor in achieving our goals is the strong bond of trust and cooperation between the family members and the interdisciplinary scientific team.

ELEPAP's programs combine individual sessions with group activities, and entertainment and game are part of therapeutic practice. Psycho-educational approach coexists with medical supervision, experience and expertise is enhanced by innovation.

About Margarita...

Margarita is addressed to young people from the age of 14 to 25 years old with mild to moderate intellectual disabilities. Margarita provides the following services: education, special professional training, professional employment and support.

In Margarita's workshops, the young people practice everyday life skills (e.g., cooking, fending for themselves, traffic education etc.), general professional skills (e.g., responsibility, consistence, cooperation etc.) and specific professional skills (e.g., use of machinery and tools, use of professional techniques etc.). At the same time, they have the opportunity to participate in sports, cultural and entertainment activities. Throughout their attendance period, they are supported by an interdisciplinary team of specialists (psychiatrist, psychologist, social workers, ergotherapists etc.).

Margarita today hosts 100 students, while also supporting 14 graduates who work in the professional sphere. Its personnel numbers 31 people and implements an education program for sustained living in a privately owned apartment in Pagrati, Athens.

3) Institute of Systemic Behavior Analysis (ISAS)

About ISAS...

The Institute of Systemic Behavior Analysis is a non-for-profit organization that offers highly specialized services primarily for children with autism and their families as well as for children with other neurodevelopmental disabilities. The therapeutic protocols are based on both the Applied Behavior Analytic model as well as the Family Systems Therapy approach. In addition, there are several research studies that are run in the Institute in affiliation to Greek and American Universities and research laboratories. Those studies aim to improve the therapeutic protocols for children with neurodevelopmental disabilities. Aside from the therapeutic services and the research studies, The Institute offers opportunities for supervision and seminars for professionals who work with children with neurodevelopmental disabilities. The work of the Institute has been acknowledged by the municipality of Athens with an award of Excellence in Therapeutic Services.

About 'Ergastiri'...

The center "ERGASTIRI - Lilian Voudouri" provides its services to 100 young people from 17 years to 25 years old with mild and moderate intellectual disabilities.

Under the supervision and guidance of Ergastiri's staff in 11 areas of Protected Work units (Bakery, Pastry, Packaging / Standardization, Laundry, Gardening, Textile / Carpeting, Ceramics, Catering, Batik, Seasonal Items, Pastry Works) the young people produce from cookies and pasta to woven, batik, ceramic and seasonal items, which they then sale.

The aim is lifelong learning and vocational training with a view to their professional and social integration into the free market and employment.

At the same time the centre strengthens socially acceptable attitudes, provides specific professional knowledge, and the opportunity to practice daily life skills for a future with as much autonomy as possible.
